**CRITICAL SECURITY REASONS**  
THIS REPORT IS NOT TO BE FURTHER TRANSMITTED WITHIN THE UNITED STATES OR BEYOND THE BORDERS OF THE UNITED STATES, WITHOUT THE EXPRESS PERMISSION OF THE RELEASE OFFICE.

**RV CABLE**  
EVALUATIONS IN THIS REPORT ARE DEFINITIVE.  
THE APPRAISAL OF CONTENT IS TENTATIVE.  
(FOR KEY SEE REVERSE)

THE FOLLOWING REPORT WAS PREVIOUSLY  
DISTRIBUTED AS PRELIMINARY  
DISSEMINATION NUMBERED

25X1

1. The contact of non-satellite members of the Neutral Nations Inspection Team (NNIT) with the population is impossible. The local population is not allowed to pass the NNIT dwelling. The non-satellite members feel their work is purely symbolic as they see only that which the Communists allow. They have no access to radio or newspapers, but did attend two Soviet films in Ch'ongjin which were magnificent from the standpoint of production and especially propaganda.
2. In early September during a two-week trip into North Korea, NNIT non-satellite members from the neutral zone observed thousands of destroyed railroad cars and hundreds of locomotives, destroyed and derailed. All bridges were damaged. The average speed of the trains was 15-17 kilometers per hour.
3. Sinanju was completely destroyed. The population was only a few hundred. Destroyed sections were converted into cultivated land. A few poorly erected barracks were observed. A new airfield, 1,400 meters long, was under construction.
4. Sinuiju was completely destroyed. A few barracks were recently constructed. Only one bridge, approximately 500 meters long, was in use. A railroad bridge was damaged only in the center. Two other bridges were not yet repaired. Antung suffered practically no damage. An old airfield near the town was under repair.
5. No war materials were being brought into Manp'o. There was no airfield in Manp'o. The Neutral Nations Supervisory Commission (NNSC) controls one bridge over the Yalu River. More bridges down the Yalu were not controlled by the NNSC. Two newly-made large modern electric locomotives were damaged and leaning against a wall.

6. The Ch'ongjin industrial area was destroyed. There was no steamer traffic in the harbor because of mines.
7. There were many destroyed locomotives and railroad cars between Ch'ongjin and Hungnam. Hungnam was completely destroyed, including electric and chemical plants. The harbor facilities were also destroyed, but there was much activity in the harbor. A mine sweeper was working the harbor and mine detonations were often heard.
